

## Penn State Pointers ► Using Liquid Herbicides

Graphics / Illustration: Tom Laird, College of Agricultural Sciences. Copyright Penn State.

**Careful application of liquid herbicides may be needed to treat small areas of dense, broadleaf weed growth.**

### Systemic Herbicides...

Used on vining or creeping weeds. Kills by being absorbed by the weed and spread through its root system.

### Contact Herbicides...

Often applied to individual weeds. Kills the weed by absorption into weed surfaces.

**After treating small areas, remove dead weeds and apply fertilizer to help the lawn fill in. Seed the area if needed.**
